

WHAT IS WATER?

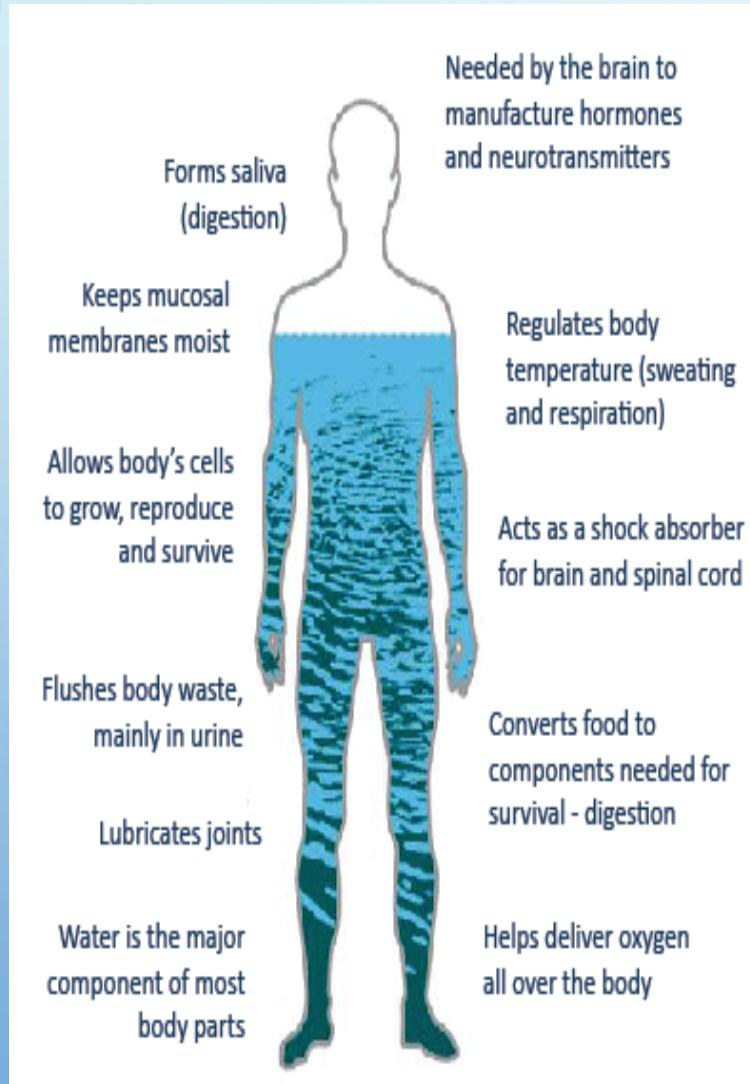

Water, a substance composed of the chemical elements hydrogen and oxygen and existing in gaseous, liquid, and solid states.

WHICH PERCENTAGE OF THE BODY MASS IS WATER?

- The human body averages 50 to 65 percent water.
- According to H.H. Mitchell, Journal of Biological Chemistry 158, the brain and heart are composed of 73% water, and the lungs are about 83% water. The skin contains 64% water, muscles and kidneys are 79%, and even the bones are watery: 31%.

BENEFITS OF WATER TO THE BODY

Makes up 80% of blood

Forms Saliva (Digestion)

Converts food to components needs for survival - digestion

Needed by the brain to manufacture hormones and neurotransmitters

Keeps mucosal membranes moist

Regulates body temperature (sweating & respiration)

Allows body's cells to grow, reproduce and survive

Acts as a shock absorber for the brain and spinal cord

Flushes body waste, mainly in urine

Helps deliver oxygen all over the body

Lubricates joints

SOURCES OF WATER

DID YOU KNOW?

- 80% of all illness in developing world is water related.
- A child dies of a water-related disease every 90 seconds.
- Globally, at least 2 billion people use a drinking water source contaminated with faeces.
- Water-related diseases affect more than 1.5 billion people every year.

DID YOU KNOW?

- Contaminated water can transmit diseases such as diarrhoea, cholera, dysentery, typhoid, and polio. Contaminated drinking water is estimated to cause 485 000 diarrhoeal deaths each year.
- By 2025, half of the world's population will be living in water-stressed areas.
- In least developed countries, 22% of health care facilities have no water service, 21% no sanitation service, and 22% no waste management service

FOOD FOR THOUGHT

- Aqua Salveo *kills all pathogens in water.*

OUR PRODUCT

AQUA SALVEO

SO WHAT IS AQUA SALVEO?

- The active ingredients in Aqua Salveo are minute traces of silver, zinc and copper that are safe for humans, but deadly to disease-causing organisms such as bacteria, fungi, parasites, protozoa and certain viruses.

COMPOSITION

- ZINC,
- COPPER, AND
- SILVER.

WHY ZINC?

- Zinc is considered an essential nutrient, meaning that your body can't produce or store it.
- For this reason, you must get a constant supply through your diet.

Zinc is required for numerous processes in your body, including:

- Gene Expression
- Enzymatic Reactions
- Immune Function
- Protein Synthesis
- DNA Synthesis
- Wound Healing
- Growth and Development

WHY COPPER?

- Virtually every cell in the body utilises copper and – together with iron and zinc – copper is one of the trio of minerals essential to good health. Copper is vital to the health of the body from foetal development through to old age. Quite simply, without copper our brains, nervous systems and cardiovascular systems could not function normally.

Copper is essential for:

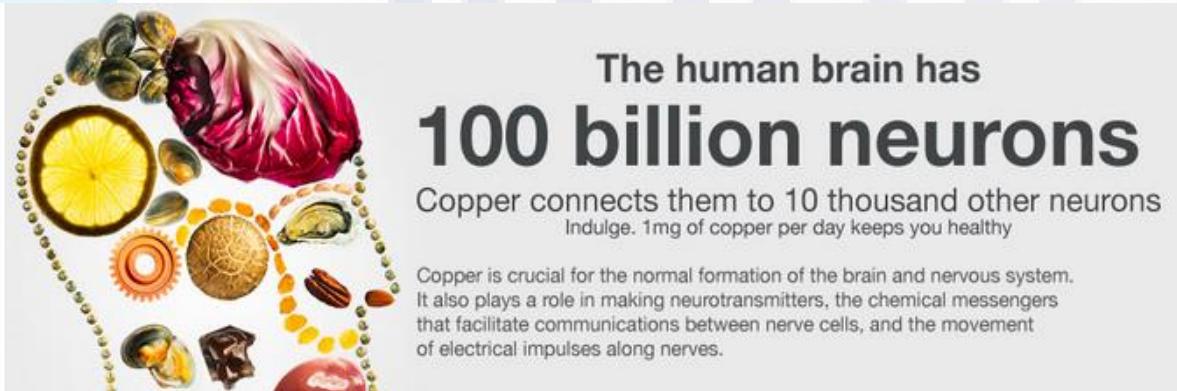

- Brain development during foetal and post-natal growth, and maintenance of brain health throughout life, including effective anti-oxidative defence
- Efficient communication between nerve cells
- Maintenance of healthy skin and connective tissue
- Wound healing

CONTINUED

Copper is essential for:

- Structural integrity and function of heart and blood vessels
- Growth of new blood vessels

- Proper structure and function of circulating blood cells
- Formation of the cells of our immune system (white blood cells)
- Maintenance of a healthy and effective immune response
- Generation and storage of energy in the 'power plants' of our cells, the mitochondria.

WHY SILVER?

- Silver a natural mineral can super-charge your immune system and help you stay healthy. Research has shown that consuming silver daily is both safe and effective for boosting and maintaining a healthy immune system.

Benefits of silver

- Destroys antibacterial bacteria in the body
- Heals wounds and skin conditions
- Prevents and kills virus's

CONTINUED....

Benefits of silver

- Anti-inflammatory
- Treats and prevents sinus infections and allergy sufferers
- Treats and prevents the common cold and flu's
- Purifies water: treats and fights against bronchitis and pneumonia
